Subject: PermaTreat™ PC-1630T

To whom it may concern,

Our product PermaTreat™ PC-1630T is a **phosphorus free**, high active membrane antiscalant for sea water and brackish water RO Plants. PC-1630T is **biodegradable** and has no known ecotoxicological effects.

Our product PermaTreat™ PC-1630T has been certified by [NSF](#) as Drinking Water Treatment Chemicals against NSF/ANSI 60 standard which is a globally recognized standard for drinking water treatment chemicals.

NSF/ANSI 60: *Drinking Water Treatment Chemicals – Health Effects* is an American National Standard that establishes the minimum health-effects requirements for the chemicals, chemical contaminants and impurities that are directly added to drinking water from drinking water treatment chemicals. This standard does not establish performance or taste and odor requirements for drinking water treatment chemicals.

Our NSF 60 certification for PC-1630T can be reviewed here: [Listing Category Search Page | NSF International](#)
